

5 Mins to Managing Your Paper & Physical Trading Books' Settlement and Risks with MAF Cloud!

MAF Cloud seamlessly integrates the front, middle and back office activities to manage your paper and physical trading books/portfolios, and monitor their performance, positions, settlement and risks exposure according to your business requirements efficiently.

1. PORTFOLIO

Manage overall performance of the individual or combination of your paper and physical trading books/portfolios according to your business needs, strategies and hierarchy.

2. PAPER TRADES

Capture paper trades automatically from your brokers' channels, exchanges or CTP futures account (China futures), and allocate them into your portfolios.

3. PHYSICAL TRADES

Facilitate and manage the lifecycle of your physical commodities trading transactions, beginning from the contractual and execution phase to the risk monitoring and settlement phase.

4. QUANTITATIVE REPORTS

Generate a variety of customisable quantitative models & reports to analyse and monitor your portfolio performance, positions and risks exposure according to management's requirements.
